

# Packing Services

## Prepared Customers save both time and money\$

Moving Made Smooth, Inc. created this checklist to ensure there are no delays or confusion during your move.

### prepare

- Valuables, medications, and weapons- must be packed separately and taken with the customer.
- Appliances- have appliances unplugged and drained of any water. If you don't know how, we would recommend having a professional detach them. Do your hook-ups match your new place?
- Electronics- have these unplugged and boxed in the original box or a new box of the proper size.
- Walkways- have these clear of boxes, furniture, and packing materials for you and your movers' safety.
- Get rid of unnecessary items- It is better to sort out and purge your home of items that are easier to rebuy in your final location or that you no longer need. You will save money getting rid of it now rather than paying to have it moved.

### supply

- Protect furnishings- We have a full line of supplies for any items you need to have packed. Ask us about our supplies for any items you want specialty packaged. If you decide not to order supplies and boxes with Moving Made Smooth, Inc, the customer is responsible for providing packing supplies.
- Drawers and cabinets- you may leave items inside of cabinets and drawers as long as they will not be damaged or damage your furniture. You can also have them shrink-wrapped closed by our staff.
- Loose items- we do not recommend having any items left loose on your moving truck. All items must be packed or sufficiently wrapped before the completion of your load.

### details

- Measurements- take measurements of your furniture and of the rooms in your new place (if possible). This can help you to determine if your furniture will fit in your new place.
- Unloadable items- some items it is illegal or impractical to be loaded onto a moving truck. These include, but are not limited to, flammables, plants, liquids, etc.
